EDUCATION

Iowa State University **August 2023 – May 2027**

Bachelor of Science in Software Engineering

- Awards: Dean's List x3, Principal Engineering Scholarship, Sue and John Lawson Scholarship
- George Washington Carver Scholar (1 in 100 students in the class awarded a full-tuition merit scholarship)
- Alpha Lambda Honor Society | Founding President, ColorStack at Iowa State University

PROFESSIONAL EXPERIENCE

John Deere **Ames, Iowa**

Channel UX Software Engineer (Part-Time) *November 2025 – Present*

- Built an AWS-hosted developer productivity tool to monitor pull request lifecycles, reducing average code review turnaround time by 42%.
- Leveraged Datadog Real User Monitoring to identify and resolve 7 user-experience issues, reducing rage clicks by 73%.
- Improved enterprise application performance by 38% across React/TypeScript systems supporting 2,000+ dealerships, contributing to faster and more responsive user experiences.
- Engineered 5 reusable GitHub Copilot AI skills incorporating project-specific context and development workflows to accelerate user story implementation and improve team productivity.

Clave **Coral Gables, Florida**

Software Engineer Intern *October 2026 – Present*

- Architected and deployed secure REST APIs for Clave's Developer Partner Program, expanding third-party access to operational data for 10+ developer partners building AI-powered restaurant management integrations.
- Engineered backend APIs, AI agent workflows, and developer tooling for a multi-unit restaurant technology platform, automating core inventory reporting to save customers up to 128 hours monthly.

Desi Eats **Wellesley, Massachusetts**

Lead Web Developer *January 2025 – Present*

- Architected and built DesiEats' website from scratch using React, implementing UX improvements such as a mobile-optimized view and navbar that drove a 300% increase in website traffic.
- Developed a calorie tracker and calculator used by 276 customers, and prototyped online checkout and food pickup features that increased average session duration by 82%.

PROJECTS

Sonic Unleashed – iOS Port **April 2026 – Present**

- Ported a desktop game recompilation project to iOS, adapting C/C++ code for ARM64, memory mapping, and application lifecycle management to enable native execution on iPhone and iPad.
- Resolved platform-specific compatibility issues involving graphics initialization, touchscreen input, and iOS packaging, enabling playable builds on physical Apple devices.

Embedded Systems Roomba Project **January 2025 – May 2025**

- Programmed autonomous navigation in C using motor and sensor data to implement scanning, mapping, and obstacle avoidance.
- Built a Python GUI for manual control and live mapping, communicating with the embedded system over Bluetooth to visualize real-time sensor data.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C, HTML/CSS, C#, C++

Cloud & DevOps: AWS, AWS Lambda, Docker, Jenkins, Git, GitHub

Scripting & Systems: Bash, Linux, UNIX, Shell Scripting

Monitoring & Development Tools: Datadog, Jira, VS Code, Agile

Frameworks & Databases: React, Node.js, MongoDB, MySQL, Firebase
